

Instructions:

1. Check and record the fridge temperature twice daily (morning and afternoon).
2. Ensure the temperature stays between 2-8°C.
3. If the temperature is outside this range, take immediate action (see below) and note it in the "Comments" section.

Action if Temperature is Out of Range:

- **Too Warm (Above 8°C):**
 - Immediately transfer medications/supplies to a temporary, monitored fridge (if available).
 - Label affected items "Do not use."
 - Contact your Kidney Australia care team for further instructions.
- **Too Cold (Below 2°C):**
 - Do not use any medications/supplies that may have frozen.
 - Contact your Kidney Australia care team.
